Custom Formulations

With decades of experience in food processing and powdered ingredient development, our team provides innovative solutions that enhance functionality, stability, and nutritional value in food and beverage applications.

- Custom ingredient blending
- Microencapsulation for improved bioavailability
- Functional and nutritional ingredient enhancement
- Clean-label and natural ingredient solutions
- High-solubility and shelf-stable powders

At Bioactive Services, we specialize in creating high-quality, customized formulations tailored to your specific needs.

House Blends

Premium House Blends for Consistent Quality

At Bioactive Resources, our House Blends are expertly crafted to deliver consistent quality, superior performance, and optimal efficacy. Designed with precision and backed by scientific research, our blends cater to a wide range of industries, including nutraceuticals, functional foods, dietary supplements, and personal care products.

What Are House Blends?

House Blends are pre-formulated combinations of bioactive ingredients that are ready for integration into your products. These blends are designed to simplify the formulation process, reduce development time, and ensure uniform quality across every batch.

House Blends

Organic Ingredients

Our organic blends are made with high-quality, certified organic ingredients sourced from sustainable farms. These blends are free from synthetic additives, pesticides, and GMOs, providing clean, nutrient-dense options for health-conscious consumers. Perfect for brands focused on natural, eco-friendly products.
