All About Ingredients

We at **Bioactive Services** are a bulk provider of wholesale dry & powder all natural food ingredients. We work with the manufacturing industry to enhance processed foods that now dominates the modern human diet.

Our **goal** is to bring the highest organic quality products to the Nutrition, Food & Beverage , pet food and cosmetics industries and provide up-to- date market information and insights on the latest pricing trends in order to help you manage the ever-changing requirements of the marketplace.

A Brief History

Serving industries worldwide, we provide herbal ingredients, bulk organic spices, plant-based vitamins, vegan supplements, and fruit and vegetable juice powders.

Founded in 2004, Bioactive Resources specialize in USDA-certified organic powders, plant-based superfoods for dietary supplements and custom formulations for wellness. With facilities in New Jersey and Nevada that are UL cGMP and USDA Organic certified, we excel in milling, steam sterilization, and blending. Our offerings include organic vegetable powders, dehydrated green leafy vegetable powders, and freeze-dried organic vegetable powders.

Meeting GMP/NSF/SQF/Kosher standards, we are trusted suppliers of food ingredients and partners with the American Growers Organic Association, delivering natural, USDA-certified organic solutions to manufacturers globally.

Our Philosophy

VISION

To be a global leader in providing innovative, high-quality bioactive solutions that enhance the health and well-being of individuals and communities worldwide.

MISSION

At Bioactive Services and Safe Sterilization, our mission is to be the premier provider of wholesale dry and powdered all-natural food ingredients. We are dedicated to meet the highest standards of purity and safety

COMMITMENT

Our commitment extends to ensuring that all our products undergo rigorous sterilization processes, preserving their natural efficacy while maintaining safety and compliance with industry standards.

Journey of Bioactive Services

2004

▶ We Began as an ingredient distributor for the nutraceutical industry.

2005

▶ Our first facility was 5000 sf building in Avenel, NJ

2006

▶ We outgrew the Avenel building, and moved into 8,000 sf in S.Plainfield.

2009

▶ In 2009 SSUSA, Safe Sterilization was born to fill the need for chemical and radiation free kill step.

2011

▶ Our services again expanded to custom formulations, toll blending and shelf ready blends.

2012

▶ Our facilities grew to over 20,000 sf to meet all our processing needs.

2016

▶ We opened an 11,000 sf facility in Reno Nevada for Safe Sterilization & low allergen processing.

2019

▶ We added another 29,000 sf building in NJ to support our blending services.

2022

▶ Safe Sterilization USA & Bioactive Resources reorganized under one new name Bioactive Services

2023

▶ Jar Filling services are fully operational

2024

▶ SQF Certification

More Expansion Coming Soon!

Our Capabilities

At Bioactive Services LLC, we offer a comprehensive suite of services designed to meet the diverse needs of the food, beverage, pet food, and dietary supplement industries. Our state-of-the-art facilities and experienced team ensure the highest quality and safety standards across all our offerings.

Bioactive Services Capabilities

Custom Formulations

We specialize in comprehensive formulation services across pharmaceuticals, nutraceuticals, and functional foods, enhancing bioavailability and efficacy of active ingredients.

1

Ingredients

Bioactive Services provides high-quality ingredients for pharmaceuticals, nutraceuticals, and functional foods, optimizing efficacy, bioavailability, and stability.

2

Toll Blending

Bioactive Services offers expert Toll blending services with state-of-the-art facilities, ensuring homogenous mixtures that preserve ingredient integrity and efficacy.

3

Packaging

We provide comprehensive packaging services, including jar filling and pouch packaging, ensuring product integrity, regulatory compliance, and consumer appeal.

4

Milling

Bioactive Services provides advanced milling services for precise particle size reduction, enhancing the bioavailability, stability, and efficacy of active ingredients.

5

R & D

Bioactive Services provides comprehensive R&D services to drive innovation, optimize formulations, and ensure regulatory compliance for market-ready products.

6

Bioactive Safe Sterilization Capabilities

Steam Sterilization

At Bioactive Services, we prioritize the safety and efficacy of your dried powdered ingredients. Our advanced steam sterilization process is designed to eliminate harmful pathogens while preserving the bioactivity and quality of your ingredients.

1

Milling

We specialize in the precision milling of dried powdered ingredients. Our state-of-the-art facilities and advanced milling technology ensure consistent particle size, enhanced solubility, and optimized texture for a wide range of applications. Whether you require fine powders for pharmaceuticals, food products, we tailor our milling processes to meet the specific needs of your product, ensuring superior quality and performance.

2

Toll Blending

We specialize in the precise toll blending of dried powdered ingredients, tailored to meet the unique needs of our clients. Our state-of-the-art facilities and expert team ensure the highest standards of quality, safety, and consistency in every batch we produce.

3

Packaging

We provide comprehensive packaging services, including jar filling and pouch packaging, ensuring product integrity, regulatory compliance, and consumer appeal.

4

Toll blending

We offer Toll blending for dry or powdered ingredients.

We specialize in providing customized powdered ingredient blending services tailored to meet the unique needs of your business. Our state-of-the-art facilities and expert team ensure the highest quality standards and efficiency for every blend.

Capabilities

Capacity:	Batch/ Day
250Kg	2*
1000kg	2*
5000kg	1-2*

- *Depending on product density*

✓ Repacking Options (no additional cost)

- Recyclable Cardboard Boxes: 25 kg minimums
- Recyclable Paper Sacks: 25 kg minimums
- Polyethylene Super Sacks: 500 kg maximums

Custom Formulations

With decades of experience in food processing and powdered ingredient development, our team provides innovative solutions that enhance functionality, stability, and nutritional value in food and beverage applications.

- Custom ingredient blending
- Microencapsulation for improved bioavailability
- Functional and nutritional ingredient enhancement
- Clean-label and natural ingredient solutions
- High-solubility and shelf-stable powders

At Bioactive Services, we specialize in creating high-quality, customized formulations tailored to your specific needs.

House Blends

Premium House Blends for Consistent Quality

At Bioactive Resources, our House Blends are expertly crafted to deliver consistent quality, superior performance, and optimal efficacy. Designed with precision and backed by scientific research, our blends cater to a wide range of industries, including nutraceuticals, functional foods, dietary supplements, and personal care products.

What Are House Blends?

House Blends are pre-formulated combinations of bioactive ingredients that are ready for integration into your products. These blends are designed to simplify the formulation process, reduce development time, and ensure uniform quality across every batch.

Ready to Ship House Blends

At Bioactive Services, our state-of-the-art manufacturing capabilities are designed to deliver precision, scalability, and efficiency for all your production needs. We combine advanced technology, robust processes, and eco-friendly practices to ensure the highest quality standards.

Organic Chocolate Protein Blend

Excellent source of protein and essential nutrients

Organic Vanilla Protein Soluble Blend

Natural, nutritious source of protein suitable for health-conscious individuals.

Organic Red Fruit Blend

Vibrant, fruity flavor and is packed with antioxidants, vitamins, and minerals to support overall health

Organic Greens Blend

Support overall health and well-being

Organic Fruit & Vegetable Blend

deliver essential vitamins, minerals, antioxidants, and dietary fiber, this blend supports overall health and wellness.

House Blends

Organic Ingredients

Our organic blends are made with high-quality, certified organic ingredients sourced from sustainable farms. These blends are free from synthetic additives, pesticides, and GMOs, providing clean, nutrient-dense options for health-conscious consumers. Perfect for brands focused on natural, eco-friendly products.

Custom Blends

Crafting Custom Blends, One Scoop At A Time

At Bioactive Services, we specialize in crafting custom blends tailored to your specific needs, ensuring each product meets the highest standards of quality and functionality. Our expertise extends across a diverse range of applications, including:

Hot & Cold Teas

Snacks & Puddings

Smoothies

Tablets & Capsules

Instant Soups

Café Drinks

Pet Nutrition

Cocktails & Mocktails

Instant Cereals

Custom Crafted Functional Blends

Our team is equipped to develop new formulations or customize existing ones to align with your brand's vision and consumer demands. We prioritize quality and innovation, ensuring that each blend not only meets regulatory standards but also delivers exceptional taste and efficacy.

Ingredients

At Bioactive Services, we provide premium quality ingredients to fuel innovation in the health, wellness, and nutrition industries. Our extensive range of USDA-certified organic and conventional ingredients is carefully sourced to meet the highest quality standards, supporting clean-label, plant-based, and functional product formulations.

Our Ingredient Categories

Organic Ingredients

Certified USDA organic ingredients sourced from trusted partners worldwide. These ingredients provide clean-label solutions for health-conscious formulations.

Botanicals & Herbs

A wide variety of botanical and herbal powders rich in bioactive compounds to support overall wellness.

Functional Ingredients

Ingredients designed to enhance the nutritional and functional properties of your products.

Fruits & Vegetables Powder

Nutrient-rich powders made from real fruits and vegetables to boost antioxidants, vitamins, and minerals in your formulations.

Branded Ingredients

Proprietary, clinically studied ingredients delivering targeted health benefits with scientific backing. These exclusive ingredients help your products stand out in the market.

Vitamins & Minerals

Zenherb Labs

**Bioactive Services now offers ZenHerb™
Wholly Plant Based Vitamin & Mineral Powders**

PBZenMulti™

A proprietary blend of entirely plant-based vitamins and minerals, delivering 7 essential vitamins (A, C, D, E, Niacin, Folate, Biotin Calcium) and 3 key minerals (Zinc & Iron). This free-flowing powder is $\geq 90\%$ water soluble, making it ideal for oral dosage forms and dietary supplements.

CZen-Iron™

is a proprietary *Murraya koenigii* extract with bio enhancing tools. This plant-based iron contains the co-factors to take care of the absorption. More than 90% water soluble extract. Vegan friendly green processing. Non GMO.

GZenZinc™

is a proprietary guava leaf extract standardized zinc and polyphenols (gallic acid equivalents). The extract is created through a green & vegan solvent extraction & temperature process. Water soluble.

SesZenBio™

A proprietary, all-natural *Sasbania grandiflora* extract, standardized to offer entirely plant based biotin.

CollaBZen™

Is a proprietary plant based collagen builder created from a blend of green tea, green coffee and amla, providing a highly efficient, vegan-friendly product. A free flowing, water soluble powder that is rich in green tea & green coffee polyphenols.

Applications of Bioactive Services Ingredients

Dietary Supplements

Enhance your supplement formulations with our organic botanicals, functional ingredients, and superfoods that support:

- Immunity Boosting
- Stress Management
- Digestive Health
- Energy & Vitality
- Weight Management

Food & Beverage

Our fruit, vegetable, and botanical powders add natural flavors, colors, and nutrients to:

- Functional Beverages
- Smoothies & Juices
- Snack Bars
- Plant-Based Foods
- Baking Products

Sports Nutrition

Power performance products with protein-rich, antioxidant, and adaptogenic ingredients to promote:

- Muscle Recovery
- Endurance
- Hydration
- Energy Boosting

Beauty & Personal Care

Harness the power of natural ingredients to support beauty-from-within and topical applications, including:

- Collagen Boosting
- Skin Hydration
- Anti-Aging
- Detoxifying Formulations

Pet Nutrition

Our natural and organic ingredients contribute to pet wellness products for:

- Digestive Health
- Joint Support
- Skin & Coat Care
- Immunity Boost

Milling

Precision Milling with Sterility & Bioactivity in Mind

At **Bioactive Services & Safe Sterilization**, we specialize in the **safe and precise milling** of powdered ingredients while ensuring sterility and preserving functional properties.

Our advanced technology and state-of-the-art facilities guarantee consistent particle size, enhanced solubility, and optimized texture, meeting the highest industry standards.

Packaging

powder packaging solutions

Comprehensive Packaging Solutions for Your Business

At **Bioactive Services**, we provide end-to-end packaging services tailored to meet the unique needs of your product line. Our seamless process ensures that your formulations are sourced, treated, blended, and packaged with the utmost precision and care—all in one location.

Our Packaging Capabilities

Jar Filling Services

Our jar filling operation was established in response to customer demands for a seamless, all-in-one solution for their formulations. Now, everything can be handled in one convenient location: formulation creation, ingredient sourcing, ingredient treatment, blending, and packaging.

Jar Sizes

- 100 grams - 900 grams

Jar Filling Specifications

- Fill Capacity: Minimum 100 grams
- Product Type: Powder
- Sealing: Induction sealing for secure, tamper-proof packaging

Production Capacity

- Semi-Automated Line: Up to 7,000 jars per day

Pouch Filling Services

Reliable and Versatile Pouch Filling Solutions

Our pouch filling services are designed to provide a flexible and efficient packaging option for your powdered formulations. From ingredient sourcing to final packaging, we offer a seamless, all-in-one solution to meet your needs.

Pouch Filling Specifications

- Pouch Sizes: Customizable to your requirements
- Product Type: Powder
- Sealing Options: Heat sealing for secure and durable closures
- Capacity Per Pouch: Adjustable based on product volume

Production Capacity

- **Semi-Automated Line: Up to 10,000 pouches per day**

Packaging Options

- Twin Pack
- Pouch Filling

Production Capacity

- Semi-automated
- 3500 NOS / shift
- 7000 NOS / shift
- Semi-automated

Future plan

- fully automated
- 25000 Units / day

Custom Solutions

- Single, twin, and multi-pack configurations
- Organic and nutraceutical-grade packaging
- Fully scalable for small and large orders alike

Streamline Your Packaging Process

With our state-of-the-art facilities and expert team, we make it simple to take your product from concept to market. From jar filling to pouch filling, our flexible and reliable packaging solutions are designed to support your business growth.

Steam Sterilization

Safe & Natural Sterilization Services

At Bioactive Safe Sterilization, we specialize in safe and effective sterilization of wholesale bulk ingredients for industries such as:

- ✓ Functional Foods
- ✓ Nutraceuticals
- ✓ Organic Foods
- ✓ Pet Food & Nutraceuticals

Ensuring Purity & Safety with Advanced Sterilization

The Challenge

In 2009, the EU implemented stringent regulations banning the use of ethylene oxide and iodizing radiation for sterilizing raw nutraceuticals due to concerns over chemical residues and potential health risks. This posed a significant challenge to industries relying on these methods for microbial control, as it necessitated the development of a safer, non-toxic, and effective alternative. Manufacturers and suppliers were compelled to seek innovative solutions that would ensure food safety without compromising product quality, nutritional integrity, or compliance with organic and natural food standards.

Our Response

At Bioactive Services, our state-of-the-art manufacturing capabilities are designed to deliver precision, scalability, and efficiency for all your production needs. We combine advanced technology, robust processes, and eco-friendly practices to ensure the highest quality standards.

Validated 5-log kill-step

We Provide a

superior organic pathogen reduction treatment. Our unique technology is specifically advantageous for aromatic products, such as herbs and botanicals, that are very sensitive to heat & moisture. Our process has been optimized to minimize the negative impacts found in traditional sterilization on flavor, color vibrancy and moisture content.

Novolyze

Producing > 5 log consistent outcomes has been third party verified by Novolyze

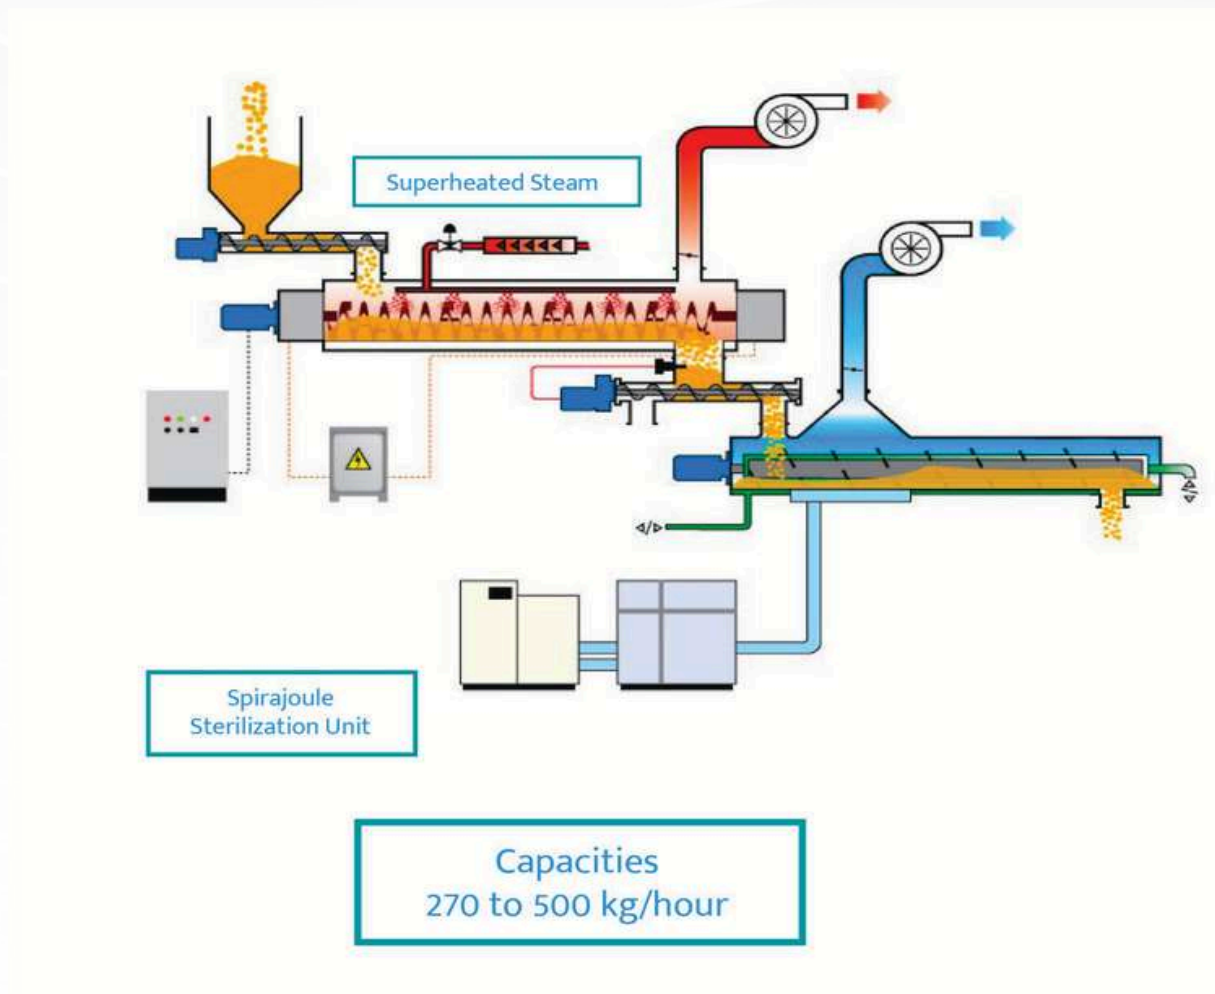

No Chemicals

No Radiation All Natural

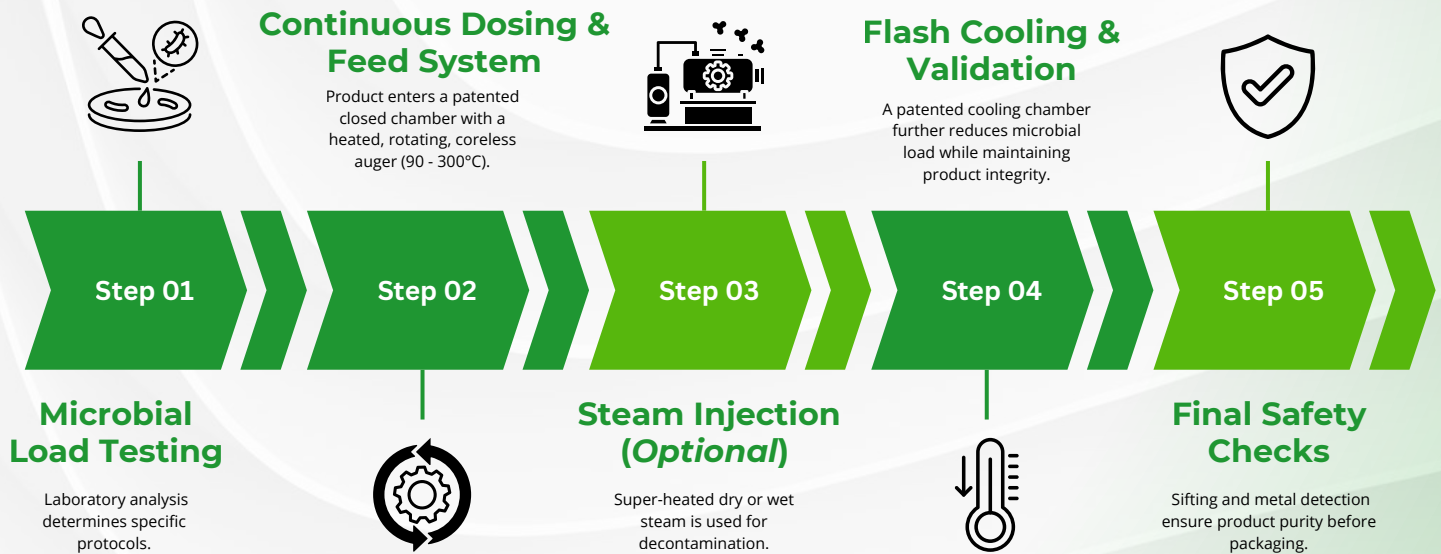

Processing Capacities & Capabilities

Capacity	270 - 500 kg/hour (varies by product)
Treatment Options	Pasteurization, Roasting, Blanching, Sterilization, Drying
Ingredient Forms	Powder, Pieces, Slices, Whole, Leaves, Crushed, Chopped, Cut
Inline Quality Checks	Sifter, REM, Metal Detector

Our Process

Value Added Services

- Repackaging Options - 15kg to 500kg
- Magnetic Sifting & Screening
- Comprehensive Safety Certifications
- Gluten-Free & Low-Allergen Processing in Nevada
- No Chemicals, No Radiation, All Natural Processing

Available Services

- Microbiological & Pathogen Analysis
- Quality Assurance Testing
- Customized Treatment Solutions

Our Competitive Edge

At Bioactive Services, our state-of-the-art manufacturing capabilities are designed to deliver precision, scalability, and efficiency for all your production needs. We combine advanced technology, robust processes, and eco-friendly practices to ensure the highest quality standards.

Delivering Measurable Value

At Bioactive Services, we understand that true innovation lies in measurable outcomes.

Bioactive Services Solutions

are designed to deliver tangible results, empowering clients to achieve their goals with scientifically validated solutions.

- ✓ **Enhanced Product Performance**
Boost efficacy and differentiation.
- ✓ **Accelerated Time-to-Market**
Streamlined processes for faster delivery.
- ✓ **Cost-Effective Solutions**
Optimized R&D and production.
- ✓ **Sustainable Practices**
Reduced environmental footprint.

Quality Assurance & Certifications

Being a quality conscious firm, we believe in offering our clients a premium range of Herbal Extract & Nutraceutical ingredients manufacturers. Our products are processed using seeds and other natural ingredients that are procured from reliable farmers or vendors of the markets. The entire range is thoroughly tested on varied parameters to ensure its taste, purity and hygiene. In order to provide our clients with high quality products, we have set-up a separate quality controlling unit, where these products are analyzed. Advanced testing tools and machines have been installed at this unit that helps in the inspection process. Moreover, we offer our range in safe and hygienic packaging to ensure its longer shelf life.

We Are Certified

At Bioactive Services, we are committed to delivering the highest quality powdered food ingredients through rigorous quality assurance protocols and esteemed industry certifications. Our dedication ensures that our products meet and exceed the stringent standards of the food processing industry.

Commitment to Quality & Safety

At Bioactive Services, we take pride in adhering to global food safety and quality standards. These accreditations reinforce our dedication to delivering safe, high-quality, and ethically produced powdered food ingredients. We continuously improve our processes to align with evolving industry regulations and best practices.

We Are Certified Our Affiliations

At Bioactive Services, we are committed to maintaining the highest standards in food processing and powdered ingredient manufacturing. Our affiliations with leading industry organizations reflect our dedication to quality, safety, sustainability, and innovation. These partnerships ensure that we stay ahead of industry trends, comply with global regulations, and provide high-quality, certified ingredients to our customers.
